Results:

Mastitis and Metritis 3 to 4 cases per Year. Medical costs are reduced by 80 %.
Insemination rate came up to 80 %. Other applications see the pictures below.

Specials: Water softener is installed.

Barns at the farm, silage is treated by 30 liter per ton

Brushes on the robot are disinfected with ANK

The hoof was treated 2 months with antibiotics without results, after 2 weeks treatment with ANK by cleaning the hoof 2 times daily the hoof was ok again.

This udder infection was treated over 2 months with all kind of antibiotics without any result. This cow produced before 35 liter milk per Day, Farmer Geert took the time to clean the udder twice a Day, see the result after 20 Days. After 1 Months the cow produced again 35 liter milk.

The farmers receive from a factory 4 to 5 tons carrot without charge as a supplement feed for the cows. The left picture shows the condition after 3 Days in summer. The right picture shows the condition after 7 Days with ANK treatment. This picture was taken by the farmer Geert.
